

3. Outline the needed dependencies. Where did you get them from?

For this project only one dependency was need

<dependency>

<groupId>org.junit.jupiter</groupId>

<artifactId>junit-jupiter-api</artifactId>

<version>5.9.3</version>

<scope>test</scope>

</dependency>

This dependency is used for writing and running unit tests with JUnit 5.

I got it from Maven Repository

<https://mvnrepository.com/artifact/org.junit.jupiter/junit-jupiter-api/5.9.3>
